NEW INDUSTRY.

Correced daily by Malinas &Co. | Sandstone Rock Quarrying by the Wholesale

On Saturday the Salt Lake Rock Company was organized and the articles of association filed. The officers are Le Grand Young, President; P. L. Williams, Vice-President; W. W. Riter, Superintendent; Alfeles Young, secretary and treasurer. These four gentlemen, together with James Sharp and S. B. Young constitute the board of directors. The company is organized with a capital stock of \$100,000, divided into 1,000 shares of\$100 each,

and 75 per cent. of the capital stock has been paid up.
As stated in the heading, the object is to quarry rock literally by wholesale. Heretofore all the sandstone-which, without exception, is the only rock used in this locality for foundation purposes—has been taken from the most accessible places by teamsters, who not only officers and directors of this company, took into consideration the advisibility of purchasing the sandstone quarries in the canyons referred to, and going at the work in a At H. Dinwoodey's Furniture Store. After mature deliberation the proposition took tangible shape. The fand enclosing the quarries was surveyed during the winter at a great expense; and at a still esting appearance. greater expense was purchased from the government and the Union Pacific Railroad company. The arrangements being completed and the company organized, the work under the direction of the superintendent, Mr. W. W. Riter, will commence immediately, While the company owns all the land con- efforts yet put forth. The canal the street railroad track to Liberty taining sandstone in any quantities Park had been laid to the northwest the intention is not, as many may suppose, to create a corner in founent Arnold has been having the dation rock. Such an intention is emphatically denied by the comthat about next Thursday this will pany; the object being to faciliate, be finished. A car is kept running rather than to retard, the securing along the track all the time, settling of a greater supply. As an earnest of this week, or certainly the early part of next, the cars will be traveling.

Tather than to retain, and searnest of a greater supply. As an earnest of this determination, a good wagen road will be built forthwith up Red Butte Canyon. The company will quarry the rock, and deliver it, or sell on the ground, as is desired, that persons engaged in hauling it, Monday, noon, will be sold without a more profitable, business than reserve a great variety of House-hold Goods. No foolishness! The property must be sold. South of McCornick's Bank, on will have as profitable, if not or systematic quarrying of the stone it can be done infinitely cheaper, and that it will pay the hauler better to buy it as quarried by the company, than it would be for him to quarry it himself with for him to quarry it himself with his meagre and crude facilities. It district. NOVELTIES IN PARASOLS is certain that the rock will not be any dearer, while it may be cheaper.

There is a very imminent pros-Use Sure Pop.

CACHE VALLEY.

Progressive Logan---Evidences of Prosperity-The Canal-Railroading, Etc., Etc.

LOGAN, CACHE CO., June 2, '82. Editors Herald:

It was said of Cache Valley by a railroad magnate from the east-a gentleman, by the way, who has traveled much-"It is the finest valley in the United States." To a person less enthusiastic than this gentleman may seem to have been, there is much here to admire. More admirable, however, than all the fascinations of scenery and beauty of location, are the evidences which tell of those hard, determined ef-forts which have built up permanent homes for a prosperous common-

wealth. In and around Logan there has been such progress made in planting and fostering industries, and in beautifying the once unseemly Receipts of bullion on Saturday:
By Wells, Fargo & Co.—One bar f Stewart bullion, \$2,400.

"Our Goblins" at the Salt Lake "O of business have experienced, Logan along the river bed, known as "the Island," has been converted from a

esting appearance. Four thousand acres of fertile land will soon be under cultivation on the plateau or elevated table land to the east of the city. This picturesque spot has been rendered valuable by the bringing out of a caual from the Logan river. This is certainly one of the most gigantic taps the river about a mile and a half up the canyon, from which point to the land in question there is a deep cut, one and a half miles in length, with twenty-one feet fall, through solid, flinty lime-stone, along the precipitous north-ern side of the canyon, which has taken an incredibly enormous quantity of powder to accomplish the blasting. When completed it will have cost some \$30,000. The same work at the rate of wages paid in Salt Lake Valley could not be done for less than \$50,000. In some places it has the appearance of tunnelling, being as much as fifty feet in depth in solid rock. It is ex-pected the water will be turned in sometime very soon, and farming and gardening begun. Surveyor Anson has already laid off a large number of city lots, and the pros-pects are good for its becoming at an early day a thickly populated

Something that will be greeted with appreciation by those inter-ested in matters of education, is the has been nearly all rented out to agriculturists, and is already netting Office of this city, viz:

several thousad dollars. There are in Logan, to-day, in course of construction between twenty-five and thirty buildings, nearly one-half of which are busiand builders, alone, have more than cessful. An almost incredibly large business in this line is done by the U. O. Manufacturing and Building Company, which has four saw-mills in constant use. The most notable job in hand at present is the building of the county court-house, which promises to be both elegant and imposing. It was designed by architect T. O. Angell, jr., and is to be built of brick, with white free-stone corners. Its base is 52x68 feet, and will be 37 feet to the square. The tower, which will rise 38 feet from the main structure, is both odd and beautiful, and will set off the buildng to admirable advantage.

One of the finest business houses recently built is that occupied by Messrs. Cardon & Thatcher, on Main street. It is a large, three-story brick structure, handsomely finished. This progressive firm has opened out one of the largest and most elegant lines of furniture, house furnishings, clocks, watches, jewelry, etc., that can be seen in the territory. It seems almost unwarrantably large.

Another imposing structure is that lately added to the premises of Zion's Board of Trade, which greatly facilitates their fast increasing business. Further south on Main street is a large frame store just for the trade. He is enabled by a finished in which Geo. Barber & Son recent arrangement with Eastern have opened business as wholesale houses to furnish these goods at the and commission merchants and dealers in wagons and machinery. Their shipments into the north of potatoes and grain amount to something large already. The shipping of grain and provisions over the wise. Goldberg guarantees these Utah & Northern is one of the paying enterprises in Logan and one

which promises some permanency. Thousands of ladies to-day in manufactures, the U.O. Foundry cherish grateful remembrances of is enlarging its premises so as to

in this struggle have never failed to afford a nice dividend which is now

northern country generally, owes much of their present prosperity to the railroad. The traffic over the Utah and Northern is something enormous. Every train for the north is crowded excessively, often rendering it necessary to attach extra cars. It is reported that as many as 2,000 men and 800 teams are at opening could have been given by the management than an

work on the grade of the Oregon Short Line, mostly having been shipped by rail over the Utah and Northern. The pay car which has just passed along the road, distrib-uted \$65,000 amongst the railroad mit of. Among others to appear are employees. This sum covers the running expenses of the Union Pacific between Ogden and Butte City. Superintendent Thatcher has an able corps of men along the line. Lately they showed their strong feelings of regard for their superintendent by presenting him with a handsome souvenir.

Drummers are infesting the town in large numbers. The Cache Valley House, which has prided itself in being fully adequate to even emergencies, has been sorely
